EXPERIENCE

Black Fox Lending

Sep 2026 — Present

US · Remote · Freelance

AI Ops Lead & Software Engineer

US real estate lending company. I own the company's entire technology side and I'm building its operating system from scratch: AI agents, internal software and the automations that connect sales, underwriting and client communication.

- → AI rehab visualization software — generates renovation previews of each property with generative AI, used in the rehab package sent to borrowers
- → GoHighLevel build-out — CRM pipelines, lead handling and follow-up automations set up for the whole sales operation
- → Automated client delivery system (in progress) — sends each client an email with property photos, integrated with the Lendr lending platform and logging every send
- → In-house lending platform (in progress) — centralizes the company's AI agents, automated lead background analysis and rehab package generation in one product

Novuskin

Sep 2026 — Present

US · Remote · Freelance

AI Engineer & Full Stack Software Engineer

Multi-location med spa in the US. I build the company's AI agents and automations across marketing, CRM and clinic operations, connecting GoHighLevel, Zenoti and N8N.

- → Generative AI creative platform — software that produces images and videos by orchestrating 5+ generative AI models, fed with Novuskin's brand context and content guidelines so every output comes out on-brand
- → Real-time company dashboard — full stack app that pulls live business data and has AI built in to answer questions about the numbers

- → Daily revenue report — automated report that combines Zenoti revenue and Meta Ads performance and delivers it to leadership every day
- → GoHighLevel CRM efficiency agent — AI agent that reviews the entire CRM and reports where the pipeline and lead handling are losing efficiency
- → Zenoti operations agent — AI agent that fills 5+ Zenoti spreadsheets and runs the related back-office processes through N8N
- → AI follow-up agent — N8N + GoHighLevel integration that sends personalized SMS and email follow-ups to each lead
- → Competitor content agent — AI agent that analyzes competitors' top-performing posts and suggests new post ideas for the company

Remote Leverage

Mar — Aug 2026

US · Remote

AI Automation Senior Developer

Internal automation developer. Built AI-powered workflows across the company's full operations stack — from recruiting and payments to marketing and customer service.

- → AI-powered Meta ad comment moderation (Instagram & Facebook) — N8N + Claude API pipeline that automatically hides negative/spam comments on ads, protecting ad deliverability and brand image, while routing ambiguous cases to Slack for human approval
- → AI comment question detection — every ad/Reel comment analyzed by Claude API to identify genuine questions, instantly routed to the marketing team via Slack for fast conversion
- → QuickBooks payment tracker — QBO webhooks → N8N → Google Sheets → Slack with in-place message updates, OAuth2 management and duplicate deduplication

- → Stripe refund & chargeback notification system — Recruit CRM lookups, Slack @mention routing by hiring manager, cascading fallback logic
- → Sales team email automation — fully automated all manual outbound emails, eliminating repetitive work and ensuring consistent communication
- → AI-powered customer service chatbot — handles common inquiries, qualifies leads, routes complex cases to human agents
- → Chargeback tracking & stage management — real-time Slack notifications at every dispute stage
- → Calendly → Recruit CRM workflow — auto-updates custom job-record fields on candidate bookings

Assaad Educação

Jan — Apr 2026

Brazil · Remote

Senior Automation Developer

Educational platform serving Brazil's top exam-prep audience. 295K followers. Contributed to ~$6M USD in platform revenue.

- → AI-powered student Q&A blog automation — N8N + Claude API pipeline that autonomously analyzed, solved, and published 2,000+ student questions to WordPress with zero manual intervention
- → Full-funnel lead capture → nurture → conversion automations across CRM, email and WhatsApp
- → WhatsApp lead generation flows, diagnostic quiz funnels, and CRM enrichment workflows

~$6M USD in platform revenue supported

Megafone Digital

Jan — Sep 2025

Brazil · Remote

Automation Developer

Top 15 Hotmart global agency. Owned and managed the entire marketing automation infrastructure — architecting, building, and maintaining all workflows

across CRM, email, WhatsApp, Instagram, and paid media operations.

- → Full marketing automation stack — CRM pipelines, email sequences, WhatsApp campaigns, Instagram integrations, and paid media workflows
- → Complex backend debugging across CRM pipelines, form submissions, and multi-step N8N workflows under high-load launch conditions
- → Supported launches generating ~R$10M in revenue across multiple product campaigns

~R$10M in launch revenue supported

TECHNICAL STACK

N8N	Zapier	Make	Claude API
OpenAI API	Claude Code	Cursor	GoHighLevel
Zenoti	Generative AI (Image & Video)	Meta Graph API	Stripe API
QuickBooks API	Slack API	WhatsApp API	Recruit CRM
HubSpot	Supabase	Google Sheets	WordPress API
SendGrid	ManyChat	OAuth 2.0	REST APIs
Webhooks	JavaScript	Python	Prompt Engineering
Agentic Systems	RAG	MCP Protocol	

HOW I WORK

01

Map First, Build Second

Every engagement starts with process mapping sessions — walking through daily operations with the team to surface bottlenecks and manual repetition before writing a single line of automation.

02

AI as the Intelligence Layer

I use Claude API as the judgment layer inside automations — handling anything that requires contextual reasoning, classification, or content generation that rules alone can't solve reliably.

03

Problem-Solver First

When I hit something outside my current knowledge, I use AI to close that gap fast and keep moving. This multiplies my problem-solving surface area far beyond any fixed technical background.
